

	Weather Forecast Division Thai Meteorological Department	Medium Range Forecasts Weather Outlook During 24 – 30 October 2026	
Weather Forecast: During 24–28 Oct 2026, continuous rainfall with scattered heavy rains and isolated very heavy rains are forecast in the South. During 25 – 27 Oct 2026, variable weather are possible following with thundershowers, gust and isolated heavy rains in the Northeast for the first period then the Northern, Central including Bangkok and its vicinity and Eastern regions will be affected subsequently. then the rest regions. This is due to the high-pressure system from China will extend to upper Thailand and the South China Sea leading to the easterly wind prevails over Thailand and the Gulf while the monsoon trough lying across the South will strengthen. During 29 - 30 Oct 2026, less rains are forecast in the country while isolated heavy rains are possible in the South (east coast). This is due to the easterly wind prevailing over Thailand and the Gulf will weaken while the monsoon trough lying across the South will weaken. In the Andaman Sea and the Gulf, the waves are expected more than 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.			
Warning: During 24 – 28 Oct 2026, people in the South should beware of heavy to very heavy rains and accumulation that may cause flash floods, overflows and landslides especially along the waterways near foothills and lowlands. During 25 – 27 Oct 2026, people in the upper country should beware of severe conditions by keeping off outdoor places, big trees and unsecured billboards. All ships in the Gulf and the Andaman Sea should proceed with caution and keep off thundershowers throughout the period.
