

**General Situation**

The rather strong southwest monsoon prevails across the Andaman Sea and the Gulf of Thailand. There remain thundershowers in the country and isolated heavy rains are possible in the the East and the South (west coast) regions. People should beware of severe conditions that may cause flash floods and overflows, especially, along foothills near waterways and lowlands.

The rather strong wind forces the waves in the Andaman Sea up to 2-3 meters high and in thundershowers more than 3 meters high. In the Gulf, the waves are 1-2 meters high and in thundershowers more than 2 meters high. All ships in the Andaman Sea and the Gulf should proceed with caution and keep off thundershowers. Small boats in the Andaman Sea keep ashore **lasting 6 June 2023.**
