Daily Weather Forecast Distribution

Monday 9 March 2026

Issued at 2300 LST

General Situation

The easterly and southeasterly winds prevail over upper Thailand while the confluence of southwesterly and southeasterly winds prevail over the North. Hot during the day is forecast in the upper country while isolated thundershowers with gust are forecast in the North. People in the upper country should keep healthy due to hot weather and beware of severe conditions.

The easterly and southeasterly wind prevails over the Gulf, the South and the Andaman Sea with isolated thundershowers in the South. The winds and waves in the lower Gulf are likely 1-2 meters high and above 2 meters high in thundershowers. All ships in the Gulf and the Andaman Sea should keep off thundershowers.

In addition, during 11-13 March 2026, the westerly trough from Myanmar will move through the North while the moderate high-pressure system from China will extend to the Northeast, the East and the South China Sea where hot weather occurs over the upper country. Outbreak of summer storms are possible following with gust, hail and heavy rains including lightning strikes in upper Thailand.
