Daily Weather Forecast Distribution

Sunday 26 April 2026

Issued at 0500 LST

General Situation

The high-pressure system from China covered the upper of Thailand and the South China Sea will weaken. The southerly and the southeasterly winds bring the moisture from the South China Sea and the Gulf to the upper country is weakening. Thailand hot weather in the North, the Northeast and the east. Less rain and isolated thundershower with gust wind are likely in the upper country. People should keep healthy due change weather and beware of thundershower and gust wind. The easterly and southeasterly winds prevail over the Gulf, the South and the Andaman Sea with isolated thundershowers in the South.

In addition, during 28 Apr – 1 May 2026, another high-pressure system from China will extend to the South China Sea and the Northeast while hot to very hot weather occurs over the upper country. Outbreak of summer storms are possible following with thunderstorm, gusty wind and hail including lightning in some areas of the Northeast, the North and the East for the first period then the Central including Bangkok and vicinity, respectively.
