**Daily Weather Forecast Distribution**

**Wednesday 18 November 2026**

**Issued at 0500 LST**

## General Situation

The moderate to rather strong high-pressure system from China extend to the upper Northeast and the South China Sea is expect to cover the upper country by tonight (18 Nov 2026). Less rain with thundershowers and isolated gusty wind are forecast in the North and western part of the Central. A decrease in temperature with strong wind are forecast in the Northeast. People in the upper country should keep healthy due to changeable weather and beware of thundershowers with gust. Farmers should prevent for crop's damage.

The Eastery wind prevailing over the Gulf and the South is strengthening with more rain and isolated heavy rains in the lower South. People in the lower South should beware of heavy rains and accumulations that may cause flash flood and overflows, especially along the waterways near foothills and lowlands.

The wind and waves in the Gulf and the Andaman Sea are expected above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.

**In addition, during 19 –22 November 2026** isolated heavy to very heavy rains are forecast in the lower South. The wind forces the waves in the lower Gulf are expected above 3 meters high in thundershowers.
